

Avo Assure for Salesforce

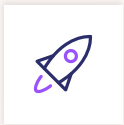

Lightning Fast Automation

Avo Assure, the #1 continuous testing platform, accelerates testing with a 100% no-code approach. Being heterogeneous, it allows you to test end-to-end business processes spanning Salesforce, SAP, Oracle, web, mobile, mainframes, and more using a single solution.

Build for Reuse

With advanced model-based test automation for 200+ technologies, you can rapidly construct, stabilize, and execute resilient test cases for Classic and Lightning. It helps you create tests based on any Salesforce configuration and seamlessly reuse across Classic and Lightning.

Rapid Automation

Create your entire test automation plan in hours – from object capture and design to execution and reporting with a few clicks.

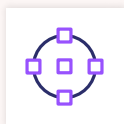

Optimization

Decrease the tools required for test case design in Salesforce by 50% and increase risk coverage.

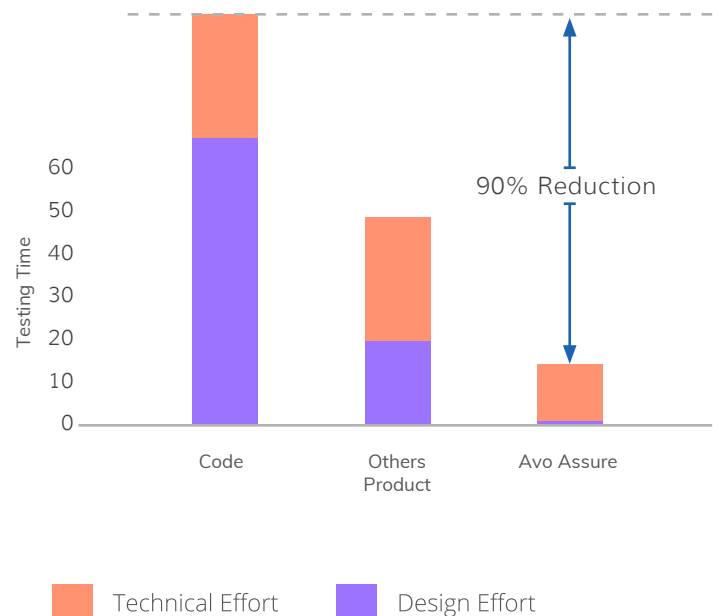

Execution & Monitoring

Build a test case once and run it across Classic and Lightning as often as required on any browser.

Seamless Integration

Leverage integrations across Salesforce touchpoints with SAP Fiori, Oracle Cloud, or other technology.
